- Apply with **Stuck on You** and **It's a fine line brush**

**RTW**

**LUXURY GEL LINER**

lush brown

**SKETCH STICK-VINTAGE**

blackened eggplant

**HOW TO CREATE A CREAM EYELINER**

Soften matte base in the microwave and blend in minerals and frost in the base jar or on a blending sheet. Once mixed, return eyeliner to base jar and melt in the microwave in 10 second increments, until liquefied to a milky consistency.

Stir well and pour into a ½ oz. jar (FA19). Allow eyeliner to cool for 4 minutes or until hardened. Recipe creates 3 jars.

**GET IN LINE.**

Heavy handed eyeliner drawn all around the eye creates a simple smoky eye. The continuous stroke of liner finishes with a wing towards the outer corner. Try smudging it towards the outer corner for an easy smoky eye.
